REPTILES AMPHIBIANS, AND FISH

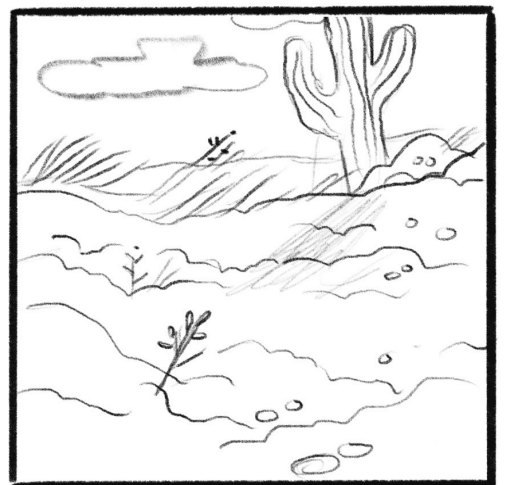

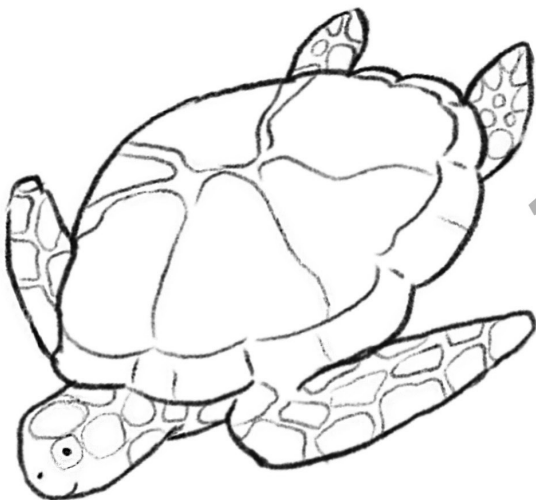

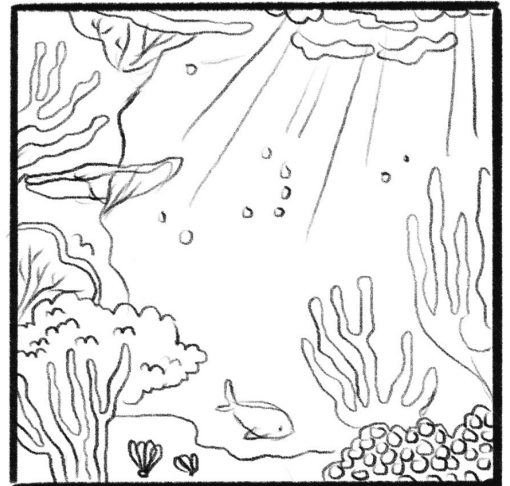

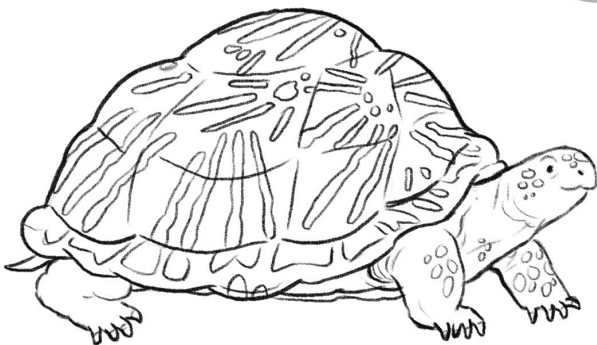

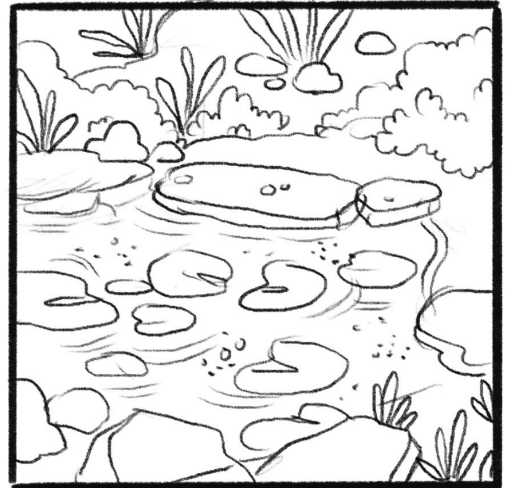

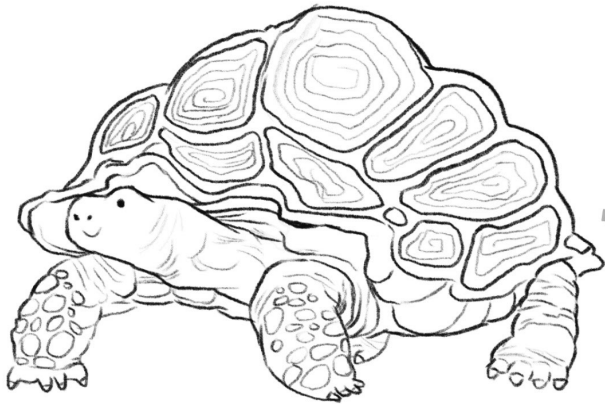

The Good AND THE Beautiful
CURRICULUM

Lesson 2

Begin at the start and trace your way through the maze to help the baby turtles get to their pond. Color the picture.

Trace each line from the turtle to its home.
Color the turtles and their homes.

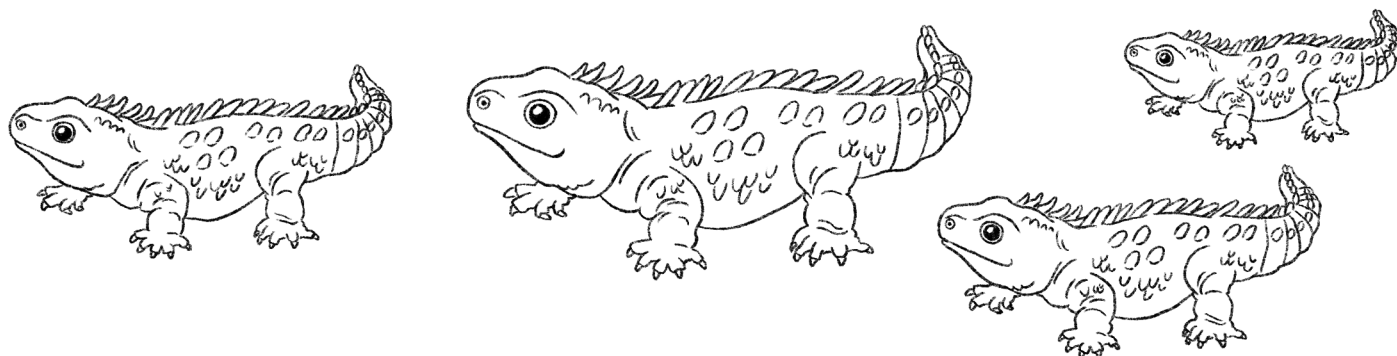

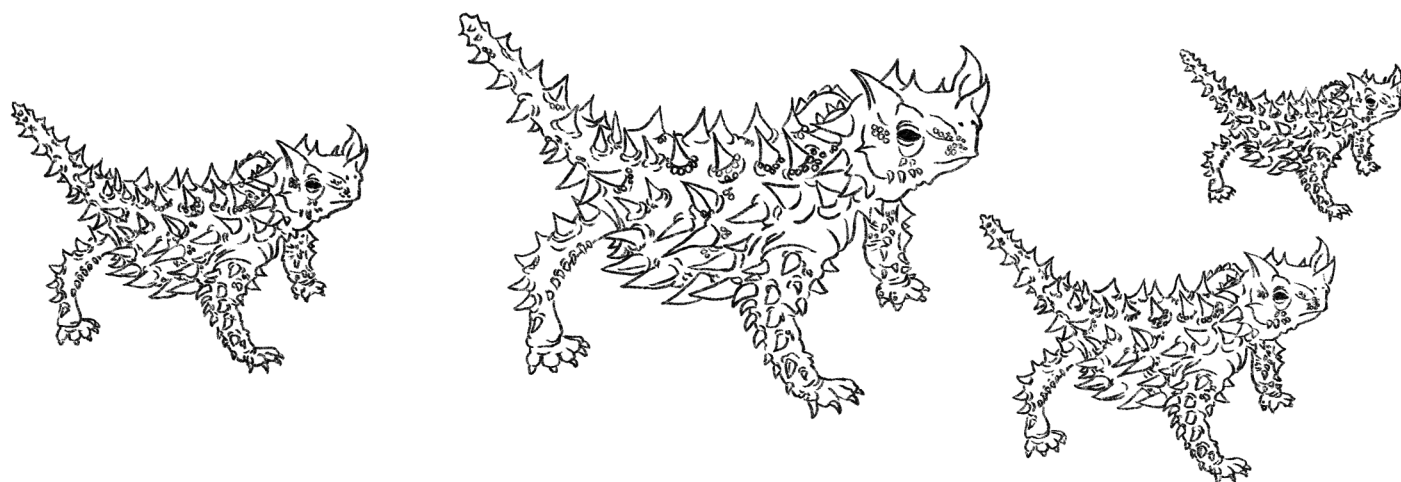

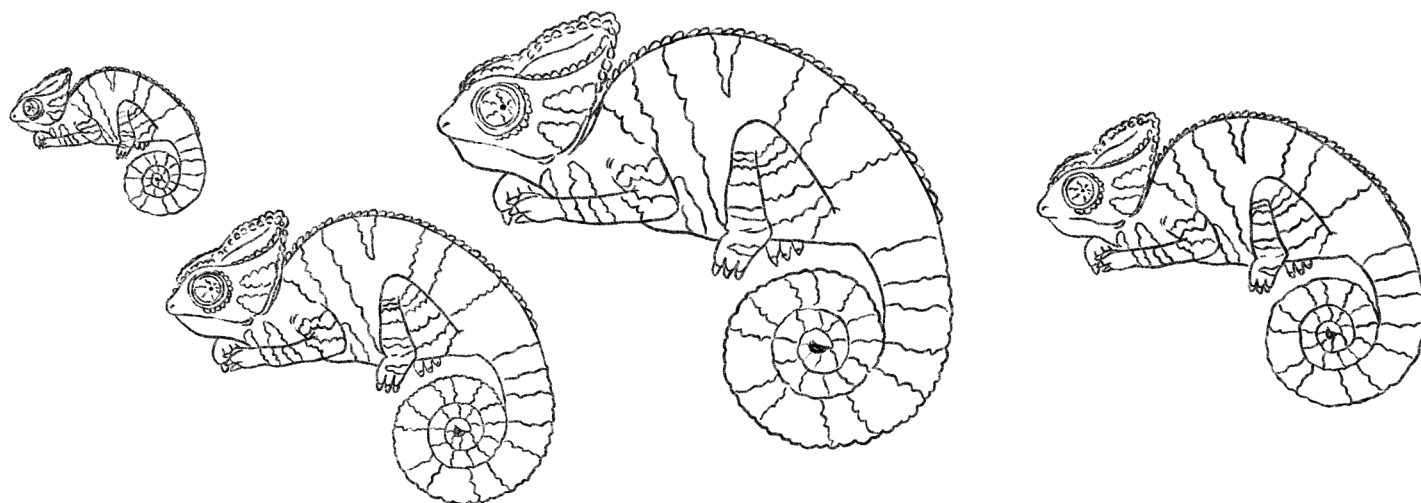

Lesson 6

Cross out the six silly things that do not belong in the picture with the tuatara. Color the picture.

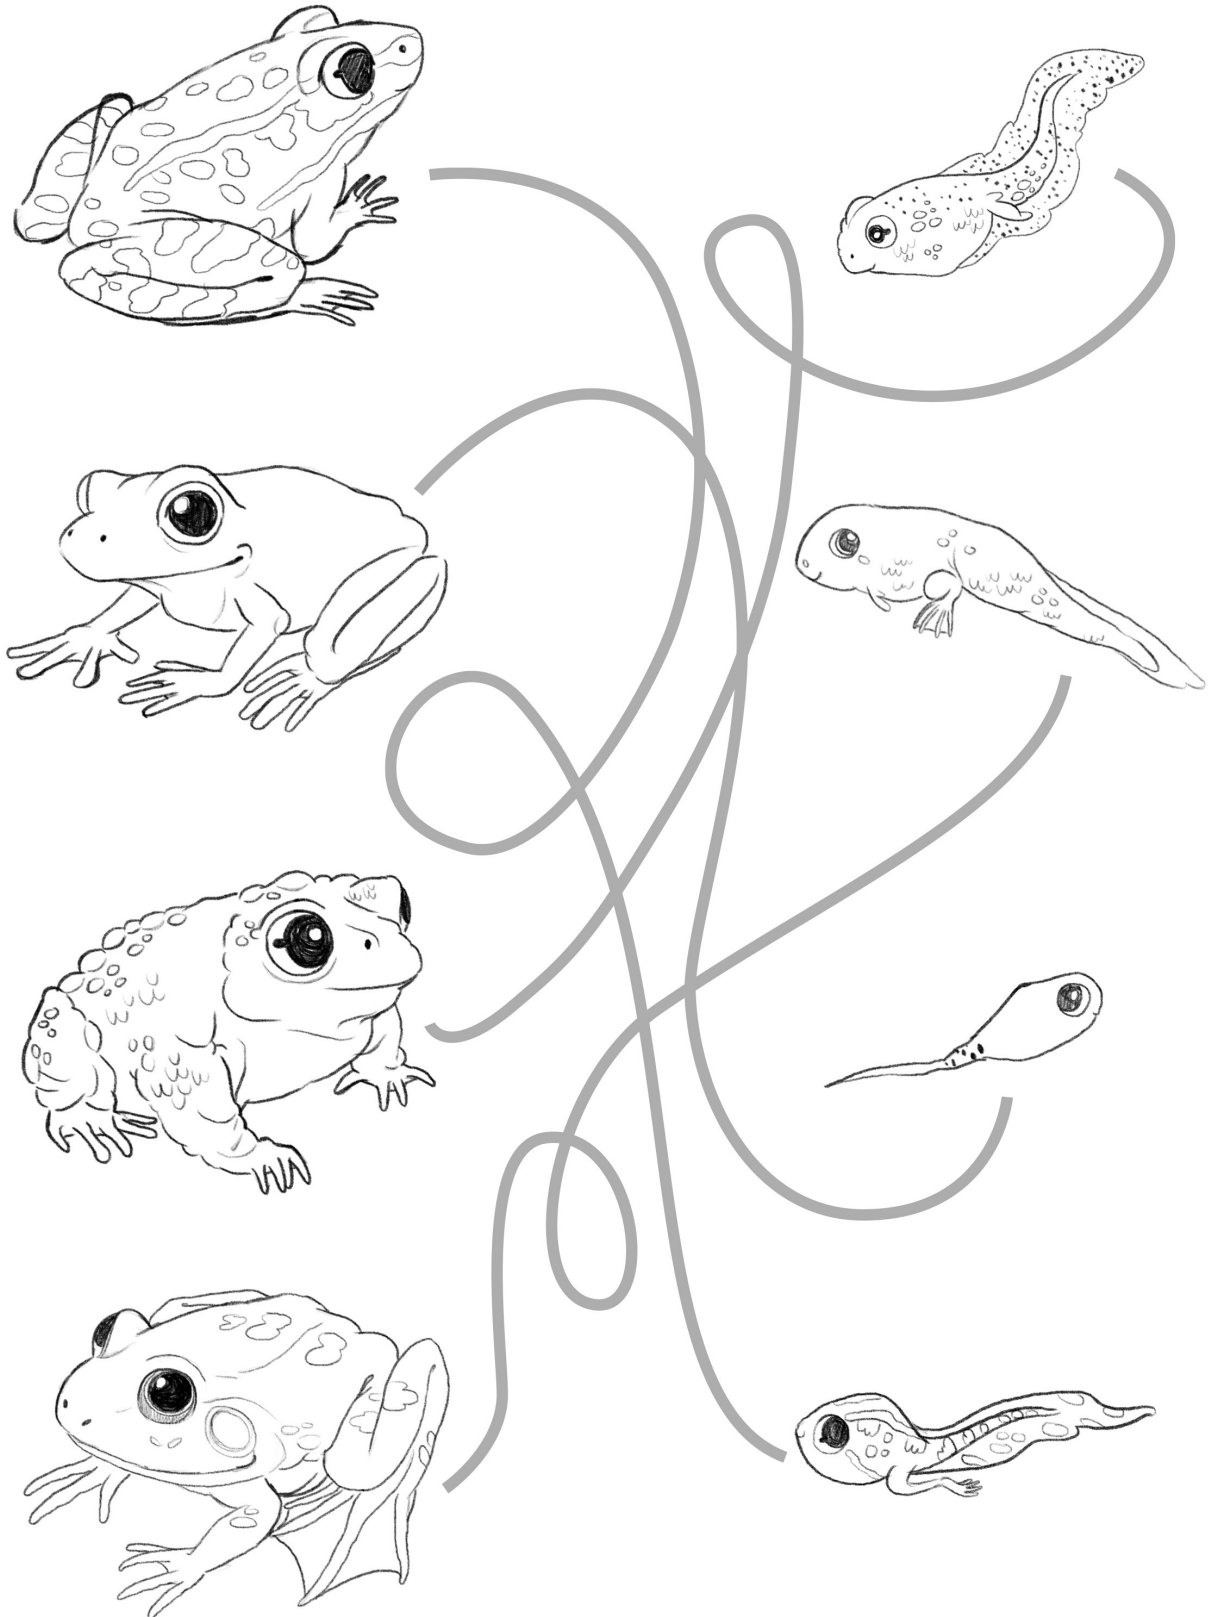

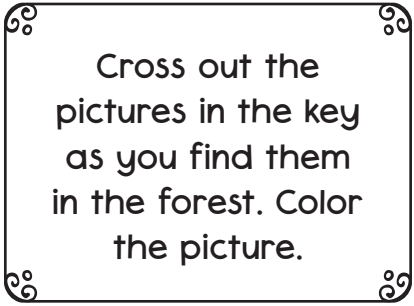

Color the two pictures in each row that are the same size.

Lesson 8

Trace each line from the tadpole to
the adult frog it will grow into.
Color the tadpoles and frogs.

KEY

The key illustrates the stages of a frog's life cycle:

- Adult Frog:** Shown in the top left and top right, with a spotted pattern.
- Egg:** A small, oval-shaped egg with a tail, located at the bottom left.
- Tadpole:** A long, oval-shaped creature with a long tail, located at the bottom center.
- Larva:** A small, spotted creature with a long tail, located at the bottom right.

A collection of black and white line drawings of various amphibians and fish, arranged around a central 'KEY' label. The illustrations include:

- Top left: A frog with large eyes and a spotted pattern on its back.
- Top center-left: A frog with large eyes and a striped pattern on its back, partially obscured by a vertical line.
- Top center-right: A toad with large eyes and a smooth, rounded body.
- Middle left: A salamander with a spotted pattern on its back.
- Middle center: A frog with large eyes and a spotted pattern on its back, sitting on a rock.
- Middle right: A salamander with a striped pattern on its back.
- Bottom left: A large frog with large eyes and a smooth body, shown in a jumping or swimming pose.
- Bottom center: A salamander with a striped pattern on its back, shown in a curled-up position.
- Bottom center-right: A fish with a spotted pattern on its body.
- Bottom right: A small tadpole with a spotted pattern on its body.
